Oaisys 2025, speaker guidelines

By QED42 feat. FreelyGive

Why this exists
Oaisys is about real work with AI, the experiments, the rebuilds, the lessons that shift how we think and make. We learn best from people who build. These guidelines exist to help you shape a session that others can learn from, too.

Who we're looking for
Practitioners — engineers, designers, architects, researchers, or makers — who've implemented AI in their workflow or shipped something with it.

What makes a great session

Real practice
Show how you applied AI — use cases and open architecture tools, a system, a model, a workflow. Bring the artifacts that made it real.

Honest reflection
Share what worked, what broke, and what surprised you. Openness helps everyone learn faster.

Transferable insight
Give something others can take away — a method, a prompt, a mental model, a toolchain.

Respect for the community
We're here to learn from each other. Keep your session open, inclusive, and grounded in shared growth.

What to avoid

- Sales or product pitches
- Generic "AI trend" talks
- Claims without facts or proven examples
- Slides overloaded with jargon

Session format

- **Duration:** 15–20 minutes
- **Flow:** Talk → Walkthrough → Q&A
- **Formats:**
  - *Show & Tell* — use case demo or walkthrough of your work
  - *Case Story* — problem, approach, challenges, and outcomes

Submission details

Name / Role / Company / Session Title
Session Description — 150 words on what you'll share and why it matters
Attachment — One PDF (max 5 MB) showing supporting work or context

What we value
Curiosity, clarity, generosity.
Go beyond thoughts, bring something tangible to the room.
